

Translate Macro Function Manual

=Translate([text to be translated];[the language in which it is written];[the language into which we want to translate])

A1		:	✕	✓	<i>fx</i>	=Translate("cześć";"pl";"en")	
	A	B	C	D	E	F	
1	hi there						

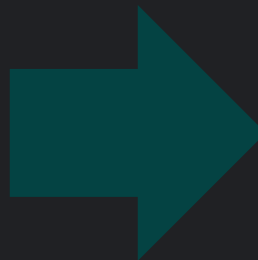

B2		⌵	⋮	✕	✓	<i>fx</i>	=Translate(A2;A1;B1)			
	A	B	C	D	E	F				
1	pl	en								
2	cześć	hi there								

When operating on cellular data, it is important that languages are lowercase.

Clear function and send file to someone witchout addon

Use “ctrl + shift + x” on cell with function. After that function will be removed, but the value will remain.

B2	:	✕	✓	<i>fx</i>	=Translate(A2;A1;B1)
	A	B			
1	en	pl			
2	hi	cześć			

B2	:	✕	✓	<i>f_x</i>	część
	A	B			
1	en	pl			
2	hi	część
